City Of San Antonio

PROFESSIONAL PAVEMENT MANAGEMENT SERVICES

I. BACKGROUND

The City of San Antonio, Public Works Department ("City") seeks Statements of Qualifications (SOQs) from qualified Respondents interested in providing Professional Pavement Management Services as described in this RFQ. The City desires proposals that will, among other things, provide automated Pavement Condition Index (PCI) scores for approximately 4,066 centerline miles of pavement network that the City is responsible for maintaining. Currently, data collected in 2010 resides in the City's Pavement Management Software (Cartegraph).

New data collected will be used with the City's Pavement Management System (PMS). The PMS is used for planning purposes across the City to include budget. In addition, the current system allows for the updating of PCI scores after rehabilitation of a street segment has been completed. Accordingly, data collected through this effort will need to be integrated with the current system.

II. SCOPE OF WORK AND GENERAL INFORMATION:

In general the following tasks shall be included in the scope of the work:

- A. **PAVEMENT DATA COLLECTION SERVICES:** The selected firm shall perform infrastructure management services to provide an inspection survey of the City's street centerline miles over a three-year period. Services will be performed on an annual basis, with collection of 1/3 of the citywide inventory of centerline miles each year, resulting in each street being surveyed within the three-year period. This effort will include the assessment of pavement condition, as well as the maintenance of an inventory in accordance with GASB-34. The data will be delivered at a three-month interval in the first year and every six months for the following two years should the second and third year option be exercised. A sample of data for 25 miles of streets must be reviewed with City staff prior to collection of all mileage associated with the first year's worth of data. While data for local/residential streets will be captured in one direction, arterials and collectors will require data collection in both directions. On request; City of San Antonio will provide existing COSA street network data for the preparation of the RFQ response. Respondent will have to sign a non-disclosure agreement and provide a media in order to obtain the data.

Pavement Surface Imaging:

- Vendor must use a downward-facing, progressive line-scan imaging solution that utilizes laser-illumination to provide high-resolution images of the pavement surface to clearly detect and quantify distresses. Frame-based imaging systems oriented oblique to the pavement surface will not be considered for this project.

- Pavement Surface Images (JPEG format) will span, at a minimum, the data collection lane from left lane stripe to right lane stripe, and will provide 100% continuous pavement coverage in the direction of travel.
- Image resolution will be approximately 1mm-pixel so that all visual cracking distresses can be accurately identified and quantified while traveling at posted highway speeds.
- Pavement Images will have a minimum horizontal resolution of 4,000 pixels or better.
- The Consultant shall collect longitudinal profile and roughness data (IRI) to provide a ride condition index for each segment to be used in calculation of the segment OCI.

The Selected Respondent Shall:

- Use a 360 degree High Definition Camera for data collection, resulting in both forward and rear facing views.
- Describe detailed methodology of their automated data collection and data analysis.
- Automated distress data collection shall be performed in accordance with ASTM D6433 Standard Practice for Roads and Parking lots Pavement Condition Index Surveys.
- International Roughness Index (IRI) data collection shall be performed in accordance to ASTM E950 (Standard Test Method for Measuring Longitudinal Profile of Traveled Surfaces with an Accelerometer Established Inertial Profiling Reference). Inertial profilers will meet the above listed requirements, and be operated in accordance with AASHTO Standards M 328, R 57-10, R 56-10 and R43M/R43-7. All IRI data will be reported at the pavement segment level.
- Rutting data shall be collected for both the left and right wheel paths to the hundredth of an inch. Average rut depths will be reported, for left wheel path, right wheel path, and combined average over the length of the pavement segment. A minimum of a 3-laser sensor rut bar is required. Rut measurements shall be in accordance with AASHTO R 48.
- Cracking distress (Fatigue, Longitudinal, Transverse and corner breaks) will be collected in accordance with the ASTM D-6433 approach to pavement distress identification and quantification.
- Describe how the proposed system views the captured images, creates records, and performs QA/QC and data verification using automated crack analysis software to reduce subjective manual review of images.

- Respondent shall develop a formal data collection Quality Management Plan (QMP). The QMP shall address data quality control for data collection as well as quality acceptance by City staff.
- Have personnel immediately available to begin work.

Deliverable by Selected Consultant:

At a minimum, the selected respondent must provide data collected in electronic format through an automated system for the following:

- A PCI score for every segment (block by block) in the City's street network. The chosen firm shall use the existing condition survey definitions when conducting the surface distress ratings and generating the Pavement Condition Index (PCI) for each segment. Data should be analyzed using a 0-100 pavement condition assessment scoring scale. The deducts from a 100 point PCI scale for each distress type should include any additional deductions taken based on both the severity and extent of each distress type. The existing deducts values and distress and severity definitions will be provided by the City.

The following details will be included for each segment:

- Pavement length and width of each street segment.
 - Distress Type
 - Distress Severity
 - Distress Extent
 - Any other comments related to the street segment, namely road conditions or areas identified for manual re-inspection
- Collected distress data must be uploaded to City's existing Pavement Management Software (Cartegraph).
 - Provide geospatially referenced JPEGs of the City's network, complete with header information (video data collection), which are directly linked or hyperlinked to the Pavement Management Software and which can be reviewed directly within the Pavement Management Software.
 - Develop software applications to identify and view areas of severe distresses in the network. The selected vendor shall be proficient in the application development and use of a video logger application. This application shall be web-based and will provide other users access to the collected data through a web-browser. The application shall provide the ability to conduct the following activities:
 - Select a section of roadway from a GIS-based map.
 - Load the Pavement and ROW imagery for that specific location.
 - View the ROW and pavement imagery as sequential images while traveling down the roadway.
 - Provide the ability to load high-resolution pictures for further investigation.

- Allow the user to review the OCI, IRI and Rut index for that section of the road.

- A database to be delivered as an ESRI personal geodatabase which shall overlay the City GIS basemap. All inspection data will be referenced to a unique street segment Id (CartID) as defined by the City. In addition, data shall be referenced to the latest State of Texas Plane Coordinate System, North American Datum 1983 (NAD 83) and the North American Vertical Datum 1988 (NAVD 88).
- **System Integration:** City of San Antonio currently uses Environmental Systems Research Institute, Inc® (ESRI) ArcInfo GIS software (version 10.0 Service Pack 5) and PAVEMENTView and PAVEMENTView+ of the CartêGraph® Software Suite (version 8.3b). All field collected data must be compatible for use with these systems.
- **Data Import Services:** All inspection data obtained during the pavement condition rating survey is to be imported for use in PAVEMENTView.
- Provide an **Executive Summary** signed and sealed by a Licensed Professional Engineer of the data collection effort as well as summarize results into tables, graphics, and descriptive text for use by the City.

B. **Cartegraph PAVEMENTView and PAVEMENTView Plus / PMS training:** Provide training and assistance to Public Works staff as needed for the use of data collected. Facilitate a training session with staff to train with Cartegraph PAVEMENTView / PAVEMENTView Plus and City's PMS, how to apply updates and edits, prediction modeling and condition analysis.

C. **Pavement Management System (PMS) Optimization:** Develop methodology to improve City's current PMS. Tasks include but are not limited to-

- I. Review and analyze city's current Pavement Management System (PMS) and existing decision trees for maintenance applications and provide recommendation for optimization. Pavement condition prediction models (performance curves and deduct values) are to be calibrated for each pavement classification within the PMS using previous and currently surveyed data. The existing deducts values and distress and severity definitions will be provided by the City.
- II. Develop methodology to prioritize projects to optimize spending and budgeting for future maintenance and repair projects.
- III. Identify work requirements necessary to meet goals and objectives.
- IV. Determine various budget scenarios for maintenance and repair
- V. A draft report with recommendation for optimization of City's current pavement maintenance practice using existing and recently collected data under this contract shall be due within six (6) months of awarding this contract.
- VI. A written report signed and sealed by a licensed professional engineer shall be submitted as a deliverable of this task.

Firm with demonstrated experience in successfully integrating data with the Cartegraph Pavement Management Module for municipalities will be viewed favorably.

The consultant, in responding to the RFQ, shall demonstrate a clear vision of the desired project outcome, as well as the methodologies and philosophies necessary to achieve the desired outcome. Submittals that demonstrate creative, unique, and cost effective philosophies and experience typically rank higher.

It is intended that the City will award a contract for services provided by the selected firm for a one year period. The City shall have the option to extend the contract for two additional one-year periods upon mutual agreement from the awarded firm and the Public Works Director.

After performing a full review, the Public Works Director will notify the respondent in writing of his determination.
- O. **Debriefings:** In an effort to improve solicitation responses, CIMS is making available on its web site a "Solicitation Response Tip List" that includes the most common items that "make or break" submissions. By providing this information prior to the due date of the submittal, a Respondent is provided with the opportunity to develop a better response to this solicitation. As a result of this up-front effort, each Respondent is entitled to a one (1) debriefing per calendar year after the San Antonio City Council has made an award if:

X. SBEDA ORDINANCE COMPLIANCE PROVISIONS

A. Solicitation Response and Contract Requirements and Commitment

Respondent understands and agrees that the following provisions shall be requirements of this solicitation and the resulting contract, if awarded, and by submitting its Response, Respondent commits to comply with these requirements

Waiver Request - A Respondent may request, for good cause, a full or partial Waiver of a **specified subcontracting goal** included in this solicitation by submitting the *Respondent Subcontracting Waiver Request* form (available at <http://www.sanantonio.gov/SBO/Forms.aspx>) with its solicitation response. The Respondent's Waiver request must fully document Sub-consultant unavailability despite the Respondent's good faith efforts to comply with the goal. Such documentation shall include all good faith efforts made by Respondent including, but not limited to, which Sub-consultants were contacted (with phone numbers, e-mail addresses and mailing addresses, as applicable) and the method of contact. **Late Waiver requests will not be considered.**

Exception Request - A Respondent may, for good cause, request an Exception to the application of the SBEDA Program if the Respondent submits the *Exception to SBEDA Program Requirements Request* form (available at <http://www.sanantonio.gov/SBO/Forms.aspx>) with its solicitation response. The Respondent's Exception request must fully document why: (1) the value of the contract is below the \$50,000 threshold for application of the SBEDA Program; or (2) no commercially-useful subcontracting opportunities exist within the contract scope of work; or (3) the type of contract is outside of the scope of the SBEDA Ordinance. **Late Exception Requests will not be considered.**

B. SBEDA Program

The CITY has adopted a Small Business Economic Development Advocacy Ordinance (Ordinance No. 2010-06-17-0531 and as amended, also referred to as "SBEDA" or "the SBEDA Program"), which is posted on the City's Economic Development (EDD) website page and is also available in hard copy form upon request to the CITY. The SBEDA Ordinance Compliance Provisions contained in this section of the Agreement are governed by the terms of this

Ordinance, as well as by the terms of the SBEDA Ordinance Policy & Procedure Manual established by the CITY pursuant to this Ordinance, and any subsequent amendments to this referenced SBEDA Ordinance and SBEDA Policy & Procedure Manual that are effective as of the date of the execution of this Agreement. Unless defined in a contrary manner herein, terms used in this section of the Agreement shall be subject to the same expanded definitions and meanings as given those terms in the SBEDA Ordinance and as further interpreted in the SBEDA Policy & Procedure Manual.

C. Definitions

Affirmative Procurement Initiatives (API) – Refers to various Small Business Enterprise, Minority Business Enterprise, and/or Women Business Enterprise (“S/M/WBE”) Program tools and Solicitation Incentives that are used to encourage greater Prime and subcontract participation by S/M/WBE firms, including bonding assistance, evaluation preferences, subcontracting goals and joint venture incentives. (For full descriptions of these and other S/M/WBE program tools, see Section III. D. of Attachment A to the SBEDA Ordinance.)

Centralized Vendor Registration System (CVR) – a mandatory electronic system wherein the City requires all prospective Respondents and SubConsultants that are ready, willing and able to sell goods or services to the City to register. The CVR system assigns a unique identifier to each registrant that is then required for the purpose of submitting solicitation responses and invoices, and for receiving payments from the City. The CVR-assigned identifiers are also used by the Goal Setting Committee for measuring relative availability and tracking utilization of SBE and M/WBE firms by Industry or commodity codes, and for establishing Annual Aspirational Goals and Contract-by-Contract Subcontracting Goals.

Certification or “Certified” – the process by which the Small Business Office (SBO) staff determines a firm to be a bona-fide small, minority-, women-owned, or emerging small business enterprise. Emerging Small Business Enterprises (ESBEs) are automatically eligible for Certification as SBEs. Any firm may apply for multiple Certifications that cover each and every status category (e.g., SBE, ESBE, MBE, or WBE) for which it is able to satisfy eligibility standards. The SBO staff may contract these services to a regional Certification agency or other entity. For purposes of Certification, the City accepts any firm that is certified by local government entities and other organizations identified herein that have adopted Certification standards and procedures similar to those followed by the SBO, provided the prospective firm satisfies the eligibility requirements set forth in this Ordinance in Section III.E.6 of Attachment A.

Commercially Useful Function – an S/M/WBE firm performs a Commercially Useful Function when it is responsible for execution of a distinct element of the work of the contract and is carrying out its responsibilities by actually performing, staffing, managing and supervising the work involved. To perform a Commercially Useful Function, the S/M/WBE firm must also be responsible, with respect to materials and supplies used on the contract, for negotiating price, determining quantity and quality, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether an S/M/WBE firm is performing a Commercially Useful Function, an evaluation must be performed of the amount of work subcontracted, normal industry practices, whether the amount the S/M/WBE firm is to be paid under the contract is commensurate with the work it is actually performing and the S/M/WBE

credit claimed for its performance of the work, and other relevant factors. Specifically, an S/M/WBE firm does not perform a Commercially Useful Function if its role is limited to that of an extra participant in a transaction, contract or project through which funds are passed in order to obtain the appearance of meaningful and useful S/M/WBE participation, when in similar transactions in which S/M/WBE firms do not participate, there is no such role performed. The use of S/M/WBE firms by CONSULTANT to perform such “pass-through” or “conduit” functions that are not commercially useful shall be viewed by the CITY as fraudulent if CONSULTANT attempts to obtain credit for such S/M/WBE participation towards the satisfaction of S/M/WBE participation goals or other API participation requirements. As such, under such circumstances where a commercially useful function is not actually performed by the S/M/WBE firm, the CONSULTANT shall not be given credit for the participation of its S/M/WBE subConsultant or joint venture partner towards attainment of S/M/WBE utilization goals, and the CONSULTANT and S/M/WBE firm may be subject to sanctions and penalties in accordance with the SBEDA Ordinance.

Evaluation Preference – an API that may be applied by the Goal Setting Committee (“GSC”) to Construction, Architectural & Engineering, Professional Services, Other Services, and Goods and Supplies contracts that are to be awarded on a basis that includes factors other than lowest price, and wherein responses that are submitted to the City by S/M/WBE firms may be awarded additional Points in the evaluation process in the scoring and ranking of their proposals against those submitted by other prime CONSULTANTS or Respondents.

Good Faith Efforts – documentation of the CONSULTANT’s or Respondent’s intent to comply with S/M/WBE Program Goals and procedures including, but not limited to, the following: (1) documentation within a solicitation response reflecting the Respondent’s commitment to comply with SBE or M/WBE Program Goals as established by the GSC for a particular contract; or (2) documentation of efforts made toward achieving the SBE or M/WBE Program Goals (e.g., timely advertisements in appropriate trade publications and publications of wide general circulation; timely posting of SBE or M/WBE subcontract opportunities on the City of San Antonio website; solicitations of bids/proposals/qualification statements from all qualified SBE or M/WBE firms listed in the Small Business Office’s directory of certified SBE or M/WBE firms; correspondence from qualified SBE or M/WBE firms documenting their unavailability to perform SBE or M/WBE contracts; documentation of efforts to subdivide work into smaller quantities for subcontracting purposes to enhance opportunities for SBE or M/WBE firms; documentation of a Prime Consultant’s posting of a bond covering the work of SBE or M/WBE SubConsultants; documentation of efforts to assist SBE or M/WBE firms with obtaining financing, bonding or insurance required by the Respondent; and documentation of consultations with trade associations and consultants that represent the interests of SBE and/or M/WBEs in order to identify qualified and available SBE or M/WBE Sub-Consultants.) CONSULTANT voluntarily agrees to fully comply with these SBEDA program terms as a condition for being awarded this contract by the CITY. Without limitation, CONSULTANT further agrees to the following terms as part of its contract compliance responsibilities under the SBEDA Program:

1. E. SBEDA Program Compliance – Affirmative Procurement Initiatives

The CITY has applied the following contract-specific Affirmative Procurement Initiatives to this contract. CONSULTANT hereby acknowledges and agrees that the selected API requirement shall also be extended to any change order or subsequent contract modification and, absent SBO's granting of a waiver, that its full compliance with the following API terms and conditions are material to its satisfactory performance under this Agreement:

SBE Prime Contract Program. In accordance with the SBEDA Ordinance, Section III. D. 3. (b), this contract is being awarded pursuant to the SBE Prime Contract Program, and as such, CONSULTANT affirms that if it is presently certified as an SBE, CONSULTANT agrees not to subcontract more than 49% of the contract value to a non-SBE firm, and

M/WBE Prime Contract Program. In accordance with the SBEDA Ordinance, Section III. D. 4. (b), this contract is being awarded pursuant to the M/WBE Prime Contract Program and as such, CONSULTANT affirms that if it is presently certified as an M/WBE (see *Minority/Women Business Enterprise* definition), CONSULTANT agrees not to subcontract more than 49% of the contract value to a non-M/WBE firm, and

SBE Subcontracting Program. In accordance with SBEDA Ordinance Section III. D. 3. (a), this contract is also being awarded pursuant to the SBE Subcontracting Program. CONSULTANT agrees to subcontract at least **ten percent (10%)** of its prime contract value to certified SBE firms headquartered or having a Significant Business Presence within the San Antonio Metropolitan Statistical Area (SAMSA). The Sub-Consultant/Supplier Utilization Plan which Consultant submitted to City with its response for this contract (or, as appropriate, that it agrees to submit during the price proposal negotiation phase of this contract), and that contains the names of the certified SBE Sub-consultants to be used by Consultant on this contract, the respective percentages of the total prime contract dollar value to be awarded and performed by each SBE Sub-consultant, and documentation including a description of each SBE Sub-Consultant's scope of work and confirmation of each SBE Sub-consultant's commitment to perform such scope of work for an agreed upon dollar amount is hereby attached and incorporated by reference into the material terms of this Agreement. In the absence of a waiver granted by the SBO, the failure of Consultant to attain this Sub-consultant goal for SBE firm participation in the performance of a Commercially Useful Function under the terms of its contract shall be a material breach and grounds for termination of the contract with City, and may result in debarment from performing future City contracts and/or shall be subject to any other remedies available under the terms of this Agreement for violations of the SBEDA Ordinance, or under any other law.

Subcontracting Diversity: The City of San Antonio strongly encourages each bidder to be as inclusive as possible, and to reach out to all segments of the M/WBE community in its efforts to exercise good faith in achieving the SBE sub-consulting goal of 10% that has been established for this contract. While the relative availability of ready, willing, and able firms within various ethnic and gender categories will vary significantly from contract to contract based upon the particular trades that are involved, overall in the San Antonio architecture and engineering industry, as reflected in the City's Centralized Vendor Registration system for the month of September 2013, African-American owned firms represent approximately 1.47% of available sub-consultants, Hispanic-American firms represent approximately 10.57%, Asian-American firms represent approximately 1.60%, Native American firms represent approximately 0.37%, and Women-owned firms represent approximately 5.77% of available architecture and engineering sub-consultants.

C. 1. of the SBEDA Ordinance. As part of such compliance, CONSULTANT shall not discriminate on the basis of race, color, religion, ancestry or national origin, sex, age, marital status, sexual orientation or, on the basis of disability or other unlawful forms of discrimination in the solicitation, selection, hiring or commercial treatment of Sub-Consultants, vendors, suppliers, or commercial customers, nor shall the company retaliate against any person for reporting instances of such discrimination. The company shall provide equal opportunity for Sub-Consultants, vendors and suppliers to participate in all of its public sector and private sector subcontracting and supply opportunities, provided that nothing contained in this clause shall prohibit or limit otherwise lawful efforts to remedy the effects of marketplace discrimination that have occurred or are occurring in the CITY's Relevant Marketplace. The company understands and agrees that a material violation of this clause shall be considered a material breach of this Agreement and may result in termination of this Agreement, disqualification of the company from participating in CITY contracts, or other sanctions. This clause is not enforceable by or for the benefit of, and creates no obligation to, any third party. CONSULTANT's certification of its compliance with this Commercial Nondiscrimination Policy as submitted to the CITY pursuant to the solicitation for this contract is hereby incorporated into the material terms of this Agreement. CONSULTANT shall incorporate this clause into each of its Sub-Consultant and supplier agreements entered into pursuant to CITY contracts.

G. Prompt Payment

Upon execution of this contract by CONSULTANT, CONSULTANT shall be required to submit to CITY accurate progress payment information with each invoice regarding each of its Sub-Consultants, including HUBZone Sub-Consultants, to ensure that the CONSULTANT's reported subcontract participation is accurate. CONSULTANT shall pay its Sub-Consultants in compliance with Chapter 2251, Texas Government Code (the "Prompt Payment Act") within ten

days of receipt of payment from CITY. In the event of CONSULTANT's noncompliance with these prompt payment provisions, no final retainage on the Prime Contract shall be released to CONSULTANT, and no new CITY contracts shall be issued to the CONSULTANT until the CITY's audit of previous subcontract payments is complete and payments are verified to be in accordance with the specifications of the contract.

H. Violations, Sanctions and Penalties

In addition to the above terms, CONSULTANT acknowledges and agrees that it is a violation of the SBEDA Ordinance and a material breach of this Agreement to:

1. Fraudulently obtain, retain, or attempt to obtain, or aid another in fraudulently obtaining, retaining, or attempting to obtain or retain Certification status as an SBE, MBE, WBE, M/WBE, HUBZone firm, Emerging M/WBE, or ESBE for purposes of benefitting from the SBEDA Ordinance;
2.
